AMENDMENT

ASSISTANT COMMISSIONER FOR PATENTS  
WASHINGTON, D.C. 20231

Dear Sir:

The present paper is filed in response to an official action received August 29, 2000. This paper is timely filed by virtue of the attached three month extension of time attached herewith. Applicants thank the Examiner for the interview on February 14, 2001.

**REMARKS**

**Summary of the rejection:**

Claims 124, 132-137, 139-143, 145-153, 155-160 and 163-173 stand rejected under 35 U.S.C. §112, first paragraph. It is the Examiner's contention that the specification does not provide a sufficient disclosure to enable one of skill in the art to employ gene therapy protocols for the intervention of obesity commensurate with the scope of the claimed invention. In essence, the Examiner appears to maintain that in order for the application to be properly enabled, it should provide specific and particular details of protocols to be used. Applicants traverse the rejection and provide the following response.
